Portfolio: ccandre.github.io/portfolioMarin

SUMMARY

Computer Science graduate with hands-on experience developing and testing web applications. Performed manual and functional testing, identified and fixed defects, verified fixes, and prepared UAT test cases and software documentation (SRS, SDD). Built dashboard features with Laravel and Vue.js.

WORK EXPERIENCE

Software Developer Intern Feb – May 2025
Baguio Smart City Command and Control Center

- Contributed to a web-based dashboard for tracking, analyzing, and visualizing 911 incident data using Laravel and Vue.js. Developed KPI cards, interactive charts, heatmaps, filters, and reporting features
- Tested dashboard features after development, reported functional and UI bugs, and verified fixes once implemented
- Cleaned and validated geographic data by correcting coordinates, removing duplicate records, and adding missing barangay information to ensure accurate map displays
- Prepared technical documentation covering system requirements, design, and application features

PROJECTS

Swapii: Barter Management System (Capstone Project)

- Developed a web-based barter management system for exchanging unused school items
- Wrote UAT test cases with test ID, steps, expected results, and pass/fail status, and collected participant results through Google Forms
- Tested registration, item listing with Amazon Rekognition image moderation, barter transactions, and real-time chat by trying valid and invalid inputs and checking that each feature behaved as expected
- Prepared Software Requirements Specification (SRS) and Software Design Document (SDD)
- Implemented responsive layouts and tested the application across different screen sizes

SKILLS

- **Testing & QA:** Manual Testing, Functional Testing, User Acceptance Testing (UAT), Test Case Writing, Bug Reporting
- **Documentation:** Software Requirements Specification (SRS), Software Design Document (SDD), Technical Documentation
- **Tools:** Git/GitHub, MySQL, Postman (basic API testing of GET, POST, PUT, and DELETE requests), Microsoft Word, Excel, Google Forms
- **Programming & Web:** JavaScript, PHP, Python, SQL, HTML/CSS, Tailwind CSS
- **Frameworks:** Laravel, Vue.js, React, Astro

EDUCATION

Bachelor of Science in Computer Science June 2025
University of Baguio
